

Everything in life is Vibration

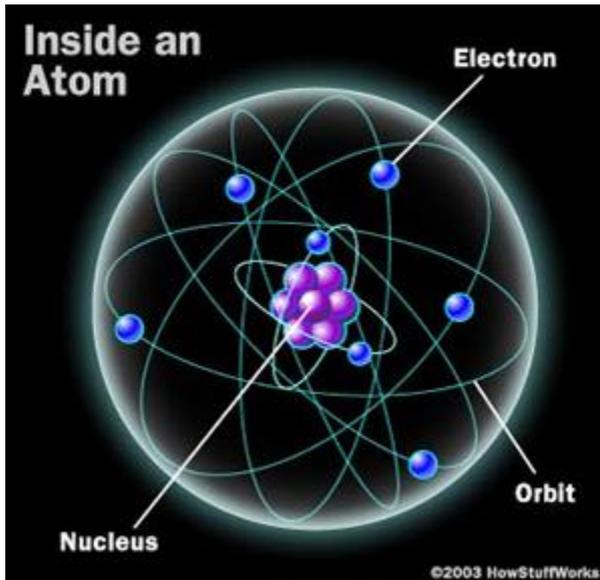

“As you experience it yourself you experience that the entire material world is nothing but vibration. When we experience the ocean of infinite waves surging within, the river of inner sensations flowing within, the eternal dance of the countless vibrations within every atom of the body. We will witness our continuously changing nature. All of this is happening at an extremely subtle level . . . As you experience the reality of matter to be vibration, you also start experiencing the reality of the mind: consciousness, perception, sensation and reaction.

*A definition of a "healer" is someone who was sick and got well, and a great healer is someone who was very sick and got well quickly.
Richard Gordon*

“Everything in Life is Vibration” – Albert Einstein

The law of nature that states everything has a vibration. If you've taken a chemistry class you probably remember learning about atoms, and that everything is made up of atoms. These atoms are in a constant state of motion, and depending on the speed of these atoms, things appear as a solid, liquid, or gas. Sound is also a vibration and so are thoughts. Everything that manifests itself in your life is there because it matches the vibration from [your thoughts](#).

Just because we don't understand something it doesn't mean it isn't true.

[Quotes from "The Secret" Movie](#)

There is no solidity in the universe. A form that appears solid is actually created by an underlying vibration. Vibrations express themselves in corresponding geometrical figures and in this way build up crystals that are the expression of vibration. Crystals collectively form a body of an element according to its particular vibration. The forms of snowflakes and faces of flowers take on their shape because they are responding to some sound in nature. Crystals, plants, and human beings are music that has taken on visible form.

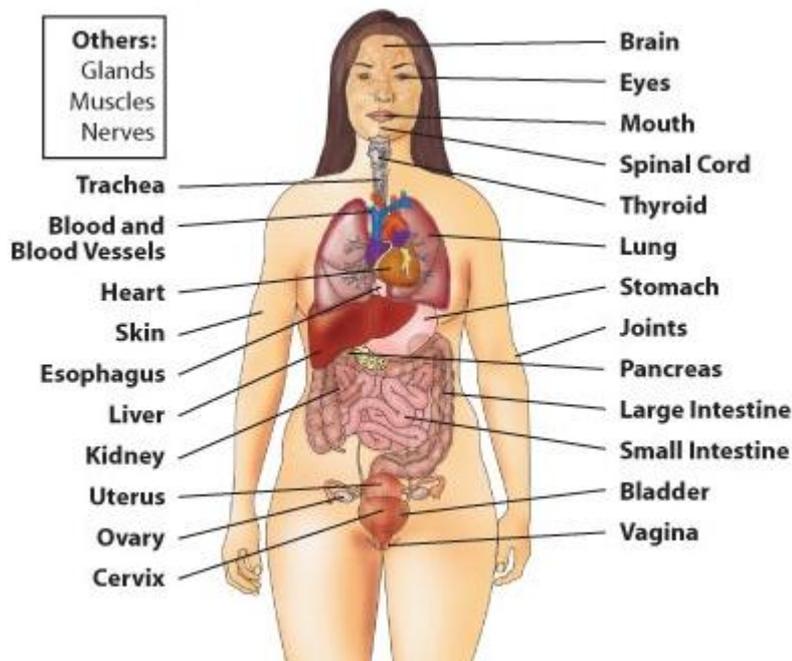

Scatter some very fine sand over the head of a drum. Then take a tuning fork and strike a note just above the drum head causing it to vibrate. The sand would shift and assume a geometrical figure corresponding to the particular note that was played. When another is sounded, the sand will shift and assume another figure. This shows that every vibration produces a corresponding geometric form

There is agreement among science, medicine and metaphysics that certain frequencies can repel disease, and certain frequencies can destroy disease. Herein lies the link between frequency (vibration) and health. Everything in nature vibrates at different frequencies. In fact quantum physics describes the universe as nothing more than vibrating strings of energy! Scientific research has shown that different parts of our bodies have their own sonic signature. In other words the sound of the cells of your heart differs from the sound of the cells of your Lungs

When parts of the body become stressed or dis-eased, they are no longer producing the correct sound wave; in other words they are not vibrating at their prime (optimal) resonant frequency. To re-establish or recalibrate your frequency, you need to understand how lower and higher vibrations affect your energy and health.

Hi-Tech Easy to Use Quantum Resonance Magnetic Analyzer plus Software

The quantum resonant magnetic analyzer is a new instrument to analyze such phenomenon. The weak magnetic frequency and energy of human body are collected by holding the sensor, and after amplification by the instrument and treatment by the built-in micro-processor, the data are compared with the standard quantum resonant spectrum of diseases, nutrition and other indicators incorporated in the instrument to judge whether the sample waveforms are irregular using the Fourier approach.

Quantum Resonant Magnetic Analyzer

All life vibrates. Everything living moves. All colors and sounds vibrate to a frequency nothing sits idle, Many of these frequencies were recorded in ancient Egypt by Hermes Trismegistus. Some of the designs on ancient structures are actually the patterns of sound vibrations and

when those notes are played they are music. here are some "[Spiritual" type Music](#) clips from different cultures,,you may find that with eyes closed the music brings one to a state of unity,,your natural state...

Some of the more radical proponents of 432 Hz as the true basis for concert pitch would indicate that everything in nature has a basis in 432 vibrations per second, most of which has not been verified and/or is not verifiable. There is one realm of nature that does support the idea that 432 Hz has an organic basis - that is the movement of the sun. Without going into a lengthy technical monologue we can ascertain that the note C of a scale based on 432 Hz can be reduced to a vibration rate of one vibration per second. We can further establish that the true origination for the measure of one second is based on the movement of the sun. There are further, more in depth, studies based on planetary motion and the harmonic overtones and undertones which do lend further support to the "organic" basis of 432 Hz as a solid foundation for musical structure. The tuning of a scale based on 440 Hz does not lend itself to a reduction on any basis which corresponds to a cosmic movement or rhythm. The difference between 440 Hz and 432 Hz is only 8 vibrations per second, but it is a perceptible difference in the human experience.[Source](#)

[Sacred Harmony Resonator](#)

Vibrational medicine interfaces with subtle energy fields that underlie the functions of a physical body. It is based on the idea of resonant frequencies, similar to a tuned string on a musical instrument resonating with anything tuned to the same frequency, or an opera singer smashing a glass by singing at a certain pitch. Some sciences and philosophies have recognised vibrational elements as an important part of the universe. It is proving difficult to link these new sciences with the dogma of Western medicine. Even as long ago as 1928 Thomas Sugrue recognised vibrational elements at work in the human body: -

" The human body is made up of electronic vibrations, with each atom and elements of the body, each organ and organism, having its electronic unit of vibration necessary for the sustenance of, and equilibrium in that particular organism. Each unit, then, being a cell or a unit of life in itself has the capacity of reproducing itself by the first the law as is known as reproduction-division. When a force in any organ or element of the body becomes deficient in its ability to reproduce that equilibrium necessary for the sustenance of physical existence and its

reproduction, that portion becomes deficient in electronic energy. This may come by injury or disease, received by external forces. It may come from internal forces through lack of eliminations produced in the system or by other agencies to meet its requirements in the body."
Edgar Cayce (1928) from *There is a River* by Thomas Sugrue.

PSYCHIC READINGS OF EDGAR CAYCE

Vibrations of Matter~Life~Energy

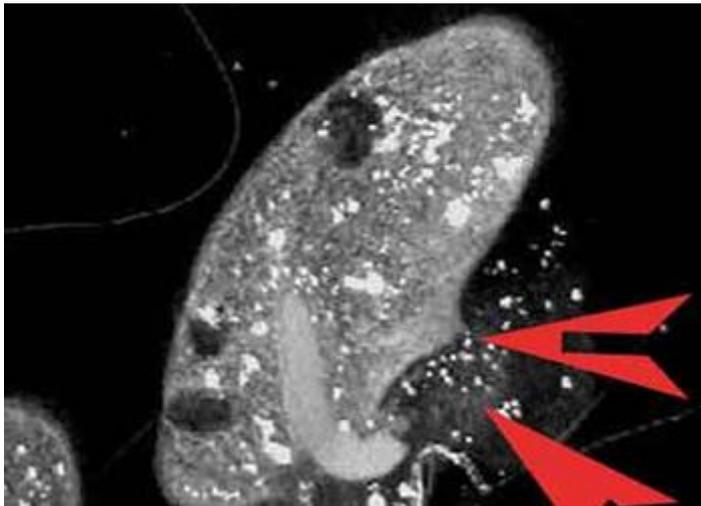

Everything vibrates) life is vibration. So is mind. So is matter. Electricity or vibration is that same energy, same power, ye call God. All forces vibration, as all comes from one central vibration taking different form And as the electrical vibrations are given, know that Life itself, to be sure, is the Creative Force or God, yet its manifestations in man are electrical or vibratory. Electricity is God in Action! Seeing this, feeling this, knowing this, ye will find that not only does the body become revived, but by the creating in every atom of its being the knowledge of the activity of this Creative Force or Principle as related to spirit, mind, body, all three are renewed.

"The Buddha said, "Sabbe Dhamma vedana samosarana", anything that arises in the mind starts flowing as a sensation on the body"

We each have our own vibrations, and vibrate at our own rate. Vibrations vary in intensity within each person and from person to person, depending upon the experiences being manifested. We are attuned to our own vibrations - this attunement is acted upon or varied by the forces surrounding or within us. It would seem that vibrations act as a cohesive agent in all nature - holding things together - as all force is vibration. All bodies radiate those vibrations with which it, the body, controls itself, in mental, and physical, and such radiation is called the aura. Each functioning organ of the sensory system reflects a different vibration

Vibration/frequencies can kill disease organisms.

A one-celled Paramecium explodes (at point of upper arrow) as it is bombarded by radio frequency waves. Its fluid contents spill out into the space around it (at point of lower arrow).

The Universe is the ultimate "radio" and we each vibrate at our own frequency.

[Quotes on Healing with Music, Sound and Vibration](#)

Ascended Master Saint Germain has said that, in truth, all one really needs to do to change any aspect of their life, heal any dis-ease, create abundance, or achieve Transfiguration of the physical body into the Ascended Realm, is to raise their vibration and frequency.

Low Intensity and Frequency Pulsed Electromagnetic Fields Selectively Impair Breast Cancer Cell Viability

*Introduction: A common drawback of many anticancer therapies is non-specificity in action of killing. We investigated the potential of ultra-low intensity and frequency pulsed electromagnetic fields (PEMFs) to kill breast cancer cells. Our criteria to accept this technology as a potentially valid therapeutic approach were: 1) cytotoxicity to breast cancer cells and; 2) that the designed fields proved innocuous to healthy cell classes that would be exposed to the PEMFs during clinical treatment. **Methods: MCF7 breast cancer cells and their normal counterparts, MCF10 cells, were exposed to PEMFs and cytotoxic indices measured in order to design PEMF paradigms that best kill breast cancer cells. The PEMF parameters tested were: 1) frequencies ranging from 20 to 50 Hz; 2) intensities ranging from 2 mT to 5 mT and; 3) exposure durations ranging from 30 to 90 minutes per day for up to three days to determine the optimum parameters for selective cancer cell killing.** Results: We observed a discrete window of vulnerability of MCF7 cells to PEMFs of 20 Hz frequency, 3 mT magnitude and exposure duration of 60 minutes per day. The cell damage accrued in response to PEMFs increased with time and gained significance after three days of consecutive daily exposure.*

By contrast, the PEMFs parameters determined to be most cytotoxic to breast cancer MCF-7 cells were not damaging to normal MCF-10 cells. Conclusion: Based on our data it appears that PEMF-based anticancer strategies may represent a new therapeutic approach to treat breast cancer without affecting normal tissues in a manner that is non-invasive and can be potentially combined with existing anti-cancer treatments.

Rife Frequency Tools

If and When our bodies deviate from their normal vibration, disease and ill effects can occur.

To begin to understand what vibrational energy can really do for you, it helps to realize that the human body is really a magnificent quantum physics machine. We are made up of literally nothing more than vibrating energy. Humans are made of cells, which are made of atoms, which are made of particles, and those so-called particles are actually just vibrating energy. Every atom is just a probability wave, and most of the stuff we call physical matter is really made up of completely empty space. We are more empty space than physical stuff; more vibration than mass. Thus, we can be strongly impacted -- either positively or negatively -- by vibrational energy.

Ultraviolet radiation from the sun, for example, helps support healthy moods, brain function, endocrine system function and sleep cycles. Sunlight photons also help us generate vitamin D, which prevents cancer, diabetes, depression and bone loss. Infrared radiation has been proven to speed recovery of wounds and injuries, and [infrared](#) LED devices are being tested by NASA to speed the growth of plants in space.

"A Tesla coil was connected to the copper tubing and activated during the treatment. At the end of 2 weeks, 70% of the patients with depression or rheumatoid arthritis were markedly improved".

Our bodies simply can not fight dis-ease if our body [pH is not properly balanced](#).

The "Earth" frequency as a basis for healing

With modern society bombarding us with so much electromagnetic energy, it seems increasingly obvious that getting more in tune with the "Earth energy" is universally healing. People who leave big, noisy cities and move out to the country enjoy spectacular health improvements. People who contact the earth through gardening, outdoors activities or consuming natural foods are far healthier than those who don't. And almost everyone agrees that a lush, green forest, humming with life, is calming and healing to both the mind and body

The universe is so vast it is not comprehensible by the human mind. It would be like an ant trying to understand the wonder of the internet. It can't be done. [The universe humbles us as it should.](#)

One explanation behind all this is that the Earth itself hums at a specific frequency, well below the audible detection range of human beings, called the [Schumann frequency or Schumann resonance](#), which you can read about on Wikipedia. If you multiply this Schumann resonance by multiples of two, you get higher harmonics of the same frequency, sort of like a higher octave on the piano. You can have a low level C note or a high level C note, and if you play them together, they are in harmony even though one is an octave higher than the other.

Rife tools and Multiwave oscillators are claimed to complement each other based on the principle that life forms absorb energy. A multi wave Oscillator uses this principle to strengthen cells within the body to resist disease while a Rife machine uses this principle to destroy microorganisms with an overdose of frequency energy.

If you want to help people get in touch with the frequency of the Earth, the obvious thing to do is get them [vibrating at](#) multiples of the Earth frequency. Through a process called entrainment, physical objects absorb the vibrational frequencies of their immediate surroundings. If you have two tuning forks and you knock one of them to get it vibrating, you only have to hold it near the other tuning fork for it to start vibrating, too. The vibration frequency radiates from the source to all objects around it, causing those objects to vibrate in harmony with the source. This is essentially what the portable [Rife](#) and the [MWO](#) machines do, too: it broadcasts a high energy healing frequency, entraining your mind, body and even the physical space around you to a frequency that's more in [tune with healthy vibrations](#).

Vibrational Medicine

Vibrational medicine is one of the most, if not the most widely studied field of medicine today. There is now global interest and research in the clinical applications of Vibrational Medicine. Vibrational Medicine, of which [Homeopathy is a part](#), has been used by various systems of medicine throughout the ages, but because of its subtle nature, until recently it has been largely ignored by the mainstream medical establishment. Fortunately, this is no longer the case. Advancements in modern technology have made it possible for the unseen/subtle to be seen. Researchers can now view and measure the body's subtle energy fields, as well as changes in these fields after Vibrational Medicine modalities have been applied. With these findings has come a new surge of global interest, research, and discoveries in all systems of

medicine vibrational in nature.

The Ultimate tool

[The Multiwave Oscillator](#)

In 1925, Georges Lakhovsky published a paper.....

His expressed philosophy was that “the amplitude of cell oscillations must reach a certain value, in order that the organism be strong enough to repulse the destructive vibrations from certain microbes.” He goes on to say, “The remedy in my opinion, is not to kill the microbes in contact with the healthy cells but to reinforce the oscillations of the cell either directly by reinforcing the radio activity of the blood or in producing on the cells a direct action by means of the proper rays.” [The Multiwave Oscillator](#) produced low frequency ELF all the way through gigahertz radio waves with lots of “extremely short harmonics.” He favored such a wide bandwidth device so that, “The cells with very weak vibrations, when placed in the field of multiple vibrations, **finds its own frequency and starts again to oscillate normally** through the phenomenon of resonance.”

The human body is a multidimensional, vibrational being with numerous, complex energetic interactions continually taking place. These complex energetic interactions - a bioenergetic communication network - emit vibratory information that precisely specify the activities taking place within the body, and these vibratory emissions are measurable with modern equipment. Current research hypothesizes that every part of the body - mental, physical, and emotional - form this continuous interconnected bioenergetic communication network.

Telomeres ordinarily shrink by 1% annually, from birth to death. The telomeres of people with unhealthy habits have much faster shrinkage, while those of people with the best habits and genes

shrink at a slower rate, thus enabling such people to live to approximately 100 years. Ultimately, telomere health is a major determinant of health and longevity. Rejuvenation or regrowth of telomeres is, therefore, a major key to longevity and health.

In a pilot study, telomeres in 6 individuals, 3 men and 3 women from 50 to 74 years of age, were measured initially in lymphocytes and neutrophils. Each participant then spent 30 minutes at least 5 days each week sitting or lying in an electromagnetic field of 54 to 78 GHz, 50 to 75 decibels, or 1 billionth of a watt per centimeter square

*In 1925 a Russian engineer, Georges Lakhovsky, published his classic book, *The Creation of Health*, in French. It was translated into English in 1935 and is still in print. He stated that human DNA has a resonant frequency of 50+ gigahertz (GHz – billions of cycles per second).*

In the early 1980s, Ukrainian physicists determined that this frequency was 54-78 GHz and further reported that a majority of illnesses were "cured" by applying these frequencies to acupuncture points. Lakhovsky further reported "helping" many illnesses, including cancer, by applying a Tesla coil to two copper coils placed three feet apart with patients sitting in the center of these coils with the head near the center of the field induced by the Tesla coil. [Tesla coils emit a random range of frequencies from 1 Hz up to at least 100 GHz. Source](#)

Each part of the body, even the smallest constituent, is a part of this bioenergetic communication network. Vibrational medicine stimulates this network, and the body's restorative systems respond without the side-effects associated with the use of pharmacological substances. Everything living vibrates at certain frequencies. This is true not only for molecules, cells, tissues, and organs, but also for parasites, bacterium, viruses, etc. Imbalances, disorders and diseases alter the bioenergetic communications network, and through the use of vibrational medical devices balance can be restored. Your body can then go to work healing itself!

Be Aware

In the 1950's, Congressman Charles Tobey enlisted Benedict Fitzgerald, an investigator for the Interstate Commerce Commission, to investigate allegations of conspiracy and monopolistic practices on the part of orthodox medicine. This came about as the result of the son of Senator Tobey who developed cancer and was given less than two years to live by orthodox medicine. However, Tobey Jr., discovered options in the alternative field, received alternative treatment and fully recovered from his cancerous condition! That is when he learned of alleged conspiratorial practices on the part of orthodox medicine. He passed the

word to his father, Senator Charles Tobey, who initiated an investigation. The final report clearly indicated there was indeed a conspiracy to monopolize the medical and drug industry and to eliminate alternative options. * "Royal R. Rife" by Gerald F. Foye ISBN 0-9659613-3-8

The "[Fitzgerald Report](#)" was submitted into the Congressional Record Appendix August 3, 1953
