## **MANUSCRIPT TYPES ACCORDING TO THE JOURNAL *SCIENTIA AGRICOLA***

### **ORIGINAL RESEARCH ARTICLE**

The Journal understands that an original scientific paper is based on a scientific hypothesis not yet clarified (original), presented through experimentation and/or theory, based on well-established methods, with an excellent statistical design and a discussion with a solid scientific base. The work encompasses the scientific merit of a problem whose solution is sought and partially or totally presented. Comparison of methods, varieties, management types, etc., can exceptionally belong to this category, that is, only when presenting well discussed scientific basis or justification. The manuscript should contain an Abstract (maximum of 250 words), Keywords (maximum of five), Introduction (30 lines), Materials and Methods, Results, Discussion (no subheadings), Acknowledgments (optional), Authors' Contributions, References, Figures and Tables with their respective legends. Keep the manuscript to a maximum of 30 pages (A4 paper).
