

**Name:** *dumpy* (*dpy*)

**Accessions:** H15 (LA4480)

**Gene ID:**

**Map position:** chromosome 2 (long arm)

**Gene function:** Probably defective in the conversion of 6-deoxocatasterone to 6-deoxoteasterone

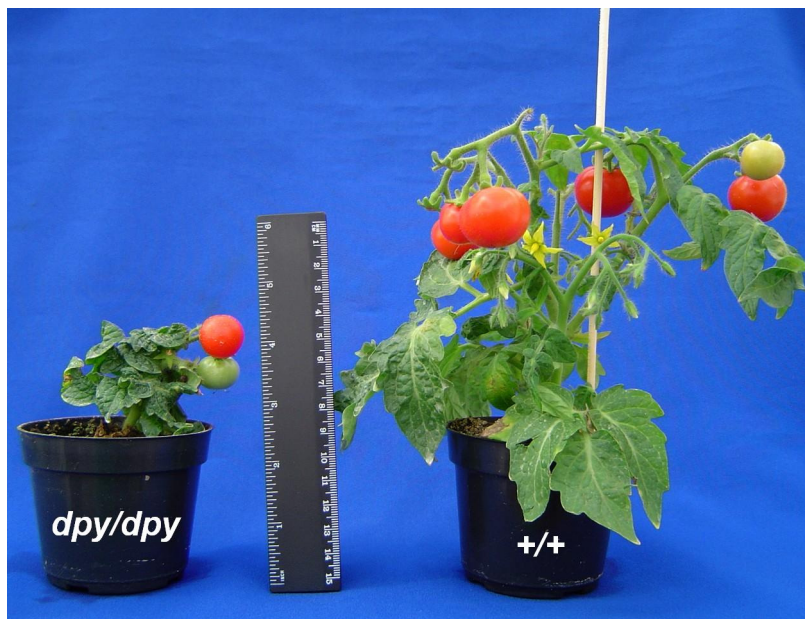

**Gene effect:** plants harboring the mutated allele are brassinosteroid deficient.

**Phenotypes:** short stature, reduced axillary branching, and curled leaves.

**Comments:**

**Description of accessions available:** MT-*dpy* is a BC6Fn introgressed from LA0811

**Figures:**

MT-*dpy* (left) showing differences in stature and leaf morphology.
