

Located in Piracicaba/SP the Luiz de Queiroz College of Agriculture (ESALQ) was inaugurated on June 3th, 1901 and since then has graduated 16 thousand professionals and awarded 10 thousand graduate degrees. It is one of the founding units of the University of São Paulo (USP) and it is among the 5 best institutions in the world in the field of agricultural science.

★★★★ **ESALQ today** ★★★★★

3.825 hectares **200** professors **467** employees **140** laboratories

12 academic departments **3.000** students enrolled **4** experimental stations

Public and free education

430

vacancies per year in 7 undergraduate courses

BACHELOR in:

- Agrarian Sciences
- Biological Sciences

BACHELOR in:

- Administration
- Biological Sciences
- Food Sciences
- Economic Sciences
- Agronomic Engineering
- Forestry Engineering
- Environmental Management

18 postgraduate programs

National and International reference recognized by Capes

Integration with society

EsalqTEC - technological incubator • Cooperation agreements with companies • Luiz de Queiroz Chair • AgTech Valley - technology in agriculture • Esalq Show

Academic and International Cooperation

Professors and students' support in international academic actions and strengthen partnerships with foreign universities

International Mobility

86 academic agreements with universities from 30 countries (including Germany, Australia, Belgium, Canada, China, Colombia, United States, France, Netherlands, Japan, Peru and Portugal)

350

students in exchange at foreign universities (since 2015)

Undergraduate double degree

Agreement between French universities which contemplates courses of Food Science, Agriculture Engineering and Forestry Engineering

200

delegations/missions received (since 2015)

Graduate double degree

Agreements between USP and foreign universities

Qualification and support

Online portuguese language course, undergraduate courses in English, sports and library

A5 Alliance

Alliance of the five best ranked schools in the area of Agricultural Sciences by the ranking of the US News Report (it includes Esalq/USP, China Agricultural University, Wageningen University, Cornell University and University of California-Davis)

★★★★★ Education ★★★★★

Undergraduate

Knowledge generation that contributes to the development of the Country

16.000

professionals graduated since 1901

seven 5-star courses in the Student Guide (+ degree in Agrarian and Biological Sciences)

Graduate Program

Training qualified human resources that are absorbed by private initiative, public research companies and educational institutions

10.000 degrees awarded
430 subjects
16 PhD courses
14 Master Degree courses
280 advisors

International excellence: theses and dissertations written in English · PhD sandwich scholarship · articles published in cooperation · exchange and double degrees

Support and improvement: CNPq and FAPESP scholarships

student life

access to internet · food, living, transport and book assistance · libraries · free English course · double degree with French institutions · internships and scholarships · exchange programs · sport center · subsidized meals

★★★★★ Research ★★★★★

Commitment to scientific improvement by encouraging knowledge and attending to society's claims.

45
patents registered

References in International Scientific databases

Opportunities

Pré-Scientific Initiation (for Middle and High School students)
 Assistance scholarships (Fapesp, CNPq, Finep)
 USP International Symposium of Undergraduate Research
 Researcher Collaborator Program
 Post doctoral
 Scientia Agricola Research Journal

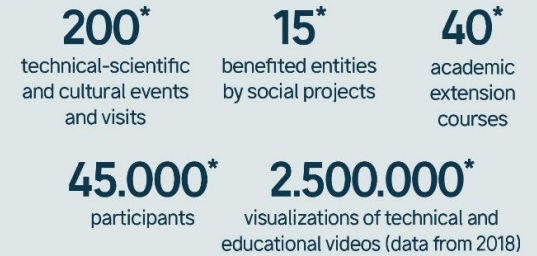

Technological Innovation

China-Brazil Center of Innovation in Agriculture
 Center for Excellence in Biological Control
 National Institute of Science and Technology of Semiochemicals in Agriculture
 National Institute of Science and Technology of Irrigation Engineering
 Instrumentation Center: Functional Genomics Laboratory
 Support Nucleus of Research in Bioenergy and Sustainability
 Electron Microscopy Laboratory
 Research Nucleus of Geochemistry and Geophysics of Lithosphere
 Research Nucleus of Ambience
 Embrapii Unit of Biocontrollers of Agricultural Prague

Academic Culture

★★★★★ and Extension ★★★★★

Cultural activities, publications, technical and scientific courses and events, monitored visits and rural producer orientation

cultural activities

Luiz de Queiroz Museum
 Musical groups: orchestra, choral and vocal group
 Art and Culture Week
 Monitored visits

Community Services

Casa do Produtor Rural – free of charge formulation of technical solutions to rural producer · Academic extension courses · MBA · Academic and thematic fairs · Horticultural implantation · Publications · Third-age activities
